HiLife Automatic Water Bowl (Brass / Plastic)

Smart auto watering · Healthy animals · Better milk production

The HiLife Automatic Water Bowl gives your cows, buffaloes and goats continuous access to fresh, clean drinking water — automatically. When the animal drinks, the bowl refills on its own via a spring-loaded valve. No more manual filling, no more empty troughs. Available with a heavy-duty ****Brass Valve**** for high-usage farms or a durable ****Plastic Valve**** for budget-friendly setups. Wall-mounted design fits any barn wall or pipe frame.
