PRESSURE REGULATOR

HiLife **Pressure Regulator**: **Controls and maintains constant pressure in dairy equipment, ensuring optimal performance and safety.**

The Pressure Regulator is a critical component used in dairy farming to maintain a consistent pressure level in various equipment, such as milking machines, feeders, and water systems. It ensures that the pressure remains within the desired range, preventing damage to the equipment and ensuring the safety of the animals. The regulator is designed to be easy to install and maintain, making it a reliable choice for dairy farmers.

Specifications

Material	High-quality stainless steel, corrosion-resistant
Pressure Range	1 - 10 kPa
Compatibility	Compatible with all standard dairy equipment
Accuracy	±0.5% accuracy
Installation	Simple, no tools required
Brand	HiLife Dairy Solution
